Reference: Franklin Park Magnet School GYM Floor

Mr. Duane Lopez,

I wanted express my sincere appreciation for the true professionalism your company has displayed during our most recent project together.

When the school board decided to completely refinish the GYM basketball court with only one week prior to school starting you stepped in and hit a home run with both R.L. James who was the General Contractor for the project as well as the Lee County School Board.

During one of my site visits I had the chance to briefly talk with your crew and they were very knowledgeable and professional. The equipment was in perfect condition and the preparation work on the floor was better than expected. Your staff paid extra attention to details around steel I-Beams to clean up the edges over and above what was expected or bid. Once completed the finish work on the floor was outstanding and the details around the steel I-Beams made a remarkable difference. We have received compliments from the GYM Teacher as well as staff members at the Lee County School Board.

Hopefully we will be working together again soon.

Respectfully,

David Thirion
Regional Sales Representative
