RE: Letter of Reference

Dear Thomas,

We are pleased to provide a letter of reference for your company for your work performed on O'Steen Volvo. The old concrete floors in the service area that were polished and then sealed are very attractive and working well for the automotive mechanics. The owner really likes the look of this floor. The epoxy and urethane floor also look nice and are working well for the owner.

JDL worked weekends and some late nights to keep on schedule which they did and never complained. Your onsite staff was very courteous and easy to work with. The punch list had touch up the epoxy floor were someone had mistakenly walked through it before it was dry and JDL came back and touched up the floors with no questions asked.

We would certainly look to JDL again for the above described floor needs in the future.

We appreciate the good work performed on this project. Should you have any questions, please do not hesitate to contact me.

Sincerely,

T. Michael Crabtree  
President
