To Whom It May Concern:

Feld Entertainment, Inc. has recently used JDL Surface Innovations for several large projects at our new 586,000 square foot facility in Palmetto, FL. Each time I was very pleased with their maintaining the schedules worked out and more importantly the quality of the floors. The floors were both 2-coat and 3-coat epoxy finish; our Motor Sports and Props Shops received the recommended 3-coat for durability and the 2-coat was used for our main production shop building. The floors were not in good condition with cracks, holes from previous footings, and metal rods projecting from the floors that needs to be dealt with. Hard work but the JDL crews were always making sure that I understood what was being done and set the expectations on a daily basis. They were always available to take my call, day or night, and that meant a lot to me. The crew is also did a good job of cleaning up and making the areas look as good as can be expected.

I will use JDL for future needs and would recommend them to others based on the experiences we have had with them at Feld.

Regards,

Sal
